

## Ascom IP DECT IPBS3

### Why a new IP Base Station?

Due to Last-Time-Buy on some components, we needed to change/update the design. The external design is the same, but made from different material due to new regulations.

### What is new?

Newer electronics and enclosure which fulfills safety standards. Look & feel are the same as IPBS2.

### Backwards compatibility?

Yes, IPBS3 is compatible with IPBS2, IPBS1, IPBL1 and IPVM.

### Interoperability?

Yes, IPBS3 follows the overall [IP-DECT System Interoperability](#) with SW 10.0 / SW 11.1.5 (or later).

### Requirements

IPBS3 itself, requires SW 11.1.5 or newer, on the Base Station (They are delivered with 11.1.4, so IPBS3 needs to be upgraded)

d41, d62: Hotfix 4.8.19 or newer

d43, d63: SW 2.9.6 or newer

d81: SW 4.11.6 or newer

The overall IP-DECT system:

- If IPBS3 is just used as a radio: SW 10.0 or newer
- If IPBS3 is to use master functionality (DECT, PARI, SYNC, MOBILITY): Entire system must run SW 11.1.5 or newer.

Failure to comply with these versions, can cause system instability, poor speech quality, lack of support from Global etc.

### Pricing & Availability

IPBS3 has the same pricing as IPBS2 to end of Q3-2020

### Variants

IPBS3 comes in three variants:

IPBS3-A3	IP-DECT Base Station with internal antennas
IPBS3-A4	IP-DECT Base Station with external antennas
IPBS3-A5	IP-DECT Base Station with 4 channels internal antennas

Art No	Benämning	Notering
IPBS2-A3A	IP-DECT Base St. Int Ant Ascom	Utgått Ersätts av IPBS3-A3
IPBS2-A4A	IP-DECT Base Station, Ext Ant	Utgått Ersätts av IPBS3-A4
IPBS2-A5A	IP-DECT BasSt 4ch IntAnt Ascom	Utgått Ersätts av IPBS3-A5
IPBS3-A3	IP-DECT Base St. Int Ant Ascom	Ny version IPBS
IPBS3-A4	IP-DECT Base Station, Ext Ant	Ny version IPBS
IPBS3-A5	IP-DECT BasSt 4ch IntAnt Ascom	Ny version IPBS

### IPBS2 Availability & phase-out

IPBS2 is End-of-Sales.
